

Interoffice Memo

LONE STAR INDUSTRIES, INC.

One Greenwich Plaza, Greenwich, Connecticut 06830

Originating Office: Seattle Cement Plant

Date: August 22, 1983

BUSINESS CONFIDENTIAL

TO: A. C. Imhoff

FROM: K. J. Rone

SUBJECT: Activity Report - Week Ending 8-21-83

EPA Region 10 Superfund

RELEASABLE

Date 5/13/08
Initial KM for GS

1. Frank Caldwell calling on B. J. Hughes in Arlington, Texas on behalf of Mr. Niemi's Alaskan Type "G" sales efforts. At this time, they have no plans to test the samples submitted indicating a bias against LSI somewhere within their organization. Mr. Niemi also submitted samples of Kaiser Cement's Type "G". It appears to meet both Type I and "G" specifications. It is presently being tested for grinding aid addition which would preclude its API certification. See Mr. Hawley.
2. LSI inventory (combined with Morris and Sons' inventory) will be surveyed as discussion proceeds for its sale to Mr. Morris.
3. Held meeting with Union Grievance Committee to discuss job postings.
4. Participated in meetings with Lakeside Sand and Gravel to assemble information about slump variability of Baker Tunnel concrete. We will produce coarser cement, test additives for slump characteristics, and test consistency of fly ash. See Mr. Hawley.
5. Employee (b) (6) alleged lost-time injury caused by "acid burns" requiring skin grafts. All information is questionable and under investigation.
6. Ordered coal barge (4,000 tons).
7. Have yet to finalize certification procedures for Type II LABA cement. Have not received certification forms. Geo. Scofield Co. has indicated that all future sack shipments should be LABA.
8. (b) (6)
9. Need decision on brokerage of Canadian coal.
10. Agreed to sack 105 tons fly ash due to Building Materials Division backlog. No hope to move any of the 1200 tons of ground slag we are continuing to hold.
11. One accident, one grievance, no visitors.
